Use Case Diagram

Use Case Scenarios

De Silva G.K.J.O - IT24102840

Number	UC-01	
Name	Contract & Document Management	
Summary	Allows uploading, viewing, and managing property-related legal documents such as contracts, agreements, and proof of ownership	
Priority	4	
Preconditions	User (Buyer/Seller/Admin) must be logged in	
Postconditions	Documents are uploaded, updated, or deleted successfully	
Primary Actors	Buyer, Seller, Admin	
Trigger	User chooses to manage property-related documents	
Main Scenario	Step	Action
	1	User selects “ Manage Documents ” option
	2	System displays document management interface
	3	User uploads or updates required documents (contracts, agreements, ownership proof)
	4	System validates document format and stores it securely
	5	Documents become available for reference by authorized parties
Extensions	Step	Branching Action
	3a	If document format/size invalid → system rejects upload
	3b	If duplicate document uploaded → system prompts user
	4a	If upload fails → system notifies the user
Open Issues	• Should expired documents automatically be archived? • Should digital signatures be supported? • Should admin be able to verify documents before approval?	

Aththanayaka A.M.S.N - IT24102891

Number	UC-02	
Name	User Inquiry Management	
Summary	The buyer selects a property listing and sends an inquiry message to the seller or agent to request more details, such as availability, pricing negotiations, or additional photos.	
Priority	4	
Preconditions	The buyer is logged into their account and is viewing a property listing.	
Postconditions	The inquiry message is stored in the system. The seller/agent receives notification of the new inquiry. The buyer can view and manage their sent message	
Primary Actors	Buyer	
Trigger	The buyer has chosen to inquire about a specific property listing for more information.	
Main Scenario	Step	Action
	1	The buyer selects a specific property from the listings and clicks "Send Inquiry" button
	2	The system displays inquiry form and buyer fills out the message details
	3	The system validates and saves the inquiry, then notifies the seller/agent
	4	The system displays confirmation message to the buyer about successful inquiry submission
Extensions	Step	Branching Action
	1a	If form validation fails or system error occurs, the system displays appropriate error message and allows the buyer to retry
Open Issues	• Should inquiries require admin moderation before delivery? • What message length limits should be enforced?	

Denesh.N - IT24102826

Number	UC-03	
Name	Property Listing Management	
Summary	Sellers and agents can add, update, and delete property listings with details and images.	
Priority	5	
Preconditions	Seller/Agent must be logged in	
Postconditions	Property listing is created, updated, deleted, or status changed successfully (available, sold, pending)	
Primary Actors	Seller / Agent	
Trigger	User chooses to manage property listings	
Main Scenario	Step	Action
	1	Seller selects “ Add Property ”
	2	System displays property listing form
	3	Seller enters property details and uploads images
	4	Seller submits the listing
	5	System validates and saves the listing as pending
	6	Admin approves → property becomes visible to buyers
Extensions	Step	Branching Action
	3a	If details are missing or invalid → system shows error message
	3b	If image format/size is wrong → system rejects upload
	6a	If Admin rejects → listing remains hidden, seller notified
Open Issues	• Should sellers be allowed bulk property upload? • Should sellers be able to mark listings as Featured? • Should expired listings be auto archived?	

Madushan E P - IT24102952

Number	UC-04	
Name	Admin Management	
Summary	Admin can approve/reject listings, manage users, and monitor content to ensure a secure and trustworthy platform.	
Priority	5	
Preconditions	Admin must be logged in	
Postconditions	Listings and user accounts are verified, updated, or removed	
Primary Actors	Administrator	
Trigger	Admin chooses to manage listings or users	
Main Scenario	Step	Action
	1	Admin logs into the system
	2	Admin navigates to Management Dashboard
	3	Admin views pending property listings and user accounts
	4	Admin approves, rejects, or deletes listings
	5	Admin manages user accounts (block, edit, or reset)
	6	Admin monitors reported content and takes necessary action
Extensions	Step	Branching Action
	4a	If listing contains invalid/misleading data → Admin rejects it
	4b	If listing violates policies → Admin deletes it immediately
	5a	If suspicious activity detected → Admin blocks user
	6a	If content flagged → Admin reviews before final action
Open Issues	• Should the system generate automatic alerts for suspicious listings? • Should Admin be able to feature certain listings on the homepage? • Should there be an audit log for all admin actions?	

Karannagodage Don Y.D.J - IT24102983

Number	UC-05	
Name	User Role & Profile Management	
Summary	Manages user registration, roles (buyer, seller, admin), and profile information	
Priority	5	
Preconditions	User must be registered or created by admin	
Postconditions	User account created, updated, or managed successfully	
Primary Actors	Admin, Buyer, Seller, Agent	
Trigger	User or Admin chooses to manage account details	
Main Scenario	Step	Action
	1	User registers or Admin creates account
	2	System assigns appropriate role (Buyer, Seller, Admin)
	3	User logs in and accesses role-based dashboard
	4	User updates profile information if needed
	5	Admin may block, edit, or reset accounts
Extensions	Step	Branching Action
	1a	If registration details are invalid → system rejects entry
	2a	If role conflict detected → system prompts Admin
	4a	If user forgets password → password reset option available
	5a	If account flagged → Admin blocks user access
Open Issues	• Should multiple roles per user be allowed? • Should profile verification (e.g., email/phone) be mandatory? • Should blocked users have an appeal/review process?	

Manodith H.A.V. - IT24102903

Number	UC-06	
Name	Appointment / Visit Scheduling	
Summary	The buyer books a property visit by selecting a time slot. The seller can confirm, reschedule, or cancel. Both sides receive notifications	
Priority	5	
Preconditions	The user (buyer/seller/agent) is logged into the system. A property listing exists and is visible to the buyer.	
Postconditions	Appointment details are stored in the system. Both buyer and seller/agent can view updated appointment status.	
Primary Actor(s)	Buyer, Seller / Agent	
Trigger	The buyer chooses to book an appointment to visit a property.	
Main Scenario	step	Action
	1	The buyer selects a property from the listings.
	2	The buyer chooses 'Book Appointment' and selects an available time slot.
	3	The system sends the appointment request to the seller/agent.
	4	The seller/agent confirms the appointment.
	5	The system updates the schedule and sends a confirmation notification to both sides.
Extensions	Step	Branching Action
	2a	If no time slots are available, the system displays: 'No appointments available at this time.'
	4a	If the seller/agent reschedules, the system sends a new time proposal to the buyer.
	4b	If the seller/agent cancels, the system notifies the buyer of the cancellation.
Open Issues	• Should the system allow automated calendar syncing (Google/Outlook)? • Should appointment reminders be sent via SMS/email as well as in-app notifications?
